

## Curriculum Vitae

### Taal

| Taal       | Niveau      |
|------------|-------------|
| Nederlands | redelijk B1 |
| English    | Werk niveau |
| Arabisch   | Moedertaal  |

### Opleiding

| Titel   | Universiteit                     | Jaar |
|---|----------------------------------|------|
| (MBA) Master of Business Administration       | SVU<br>Syrian virtual university | 2011 |
| BS in computer science (software engineering) | UOK<br>University of Kalamoon    | 2008 |
| BA in Electronics and Communications          | Damascus University              | 2004 |

### Trainingen en Cursussen

| Naam Training  | Training Centrum                     | Jaar          | Certificaat |
|--|--------------------------------------|---------------|-------------|
| Certified Full stack developer (online Internship-6 maanden) | Startel<br>Online                    | 2018-<br>2019 |             |
| .NET CORE  | Edx<br>Online                        | 2019          |             |
| Scrum Master PSM1  | Scrum.org                            | 2019          |             |
| CEH 9.0 v /v10   | TSTC, Tshukudu<br>Technology College | 2017          | Ja          |
| CCNA   | One trining                          | 2017          | Ja          |
| CCNA-Cyber-operations  | One trining                          | 2017          | Ja          |
| IOT  | One trining                          | 2017          | Ja          |
| Network+   | Connect IT zuid                      | 2017          | Ja          |
| Cyber security   | Connect IT zuid                      | 2017          | Ja          |
| Web Development & design                                     | SBS Center                           | 2010          | Ja          |

### Kennis en ervaring

| Technische software           | Programmeertaal               | OS/ Software                           |
|-------------------------------|-------------------------------|--|
| Scrum , Agile                 | C#                            | Windows , Mac , Linux                  |
| Joint Application Development | ASP.net , MVC , ASP .net Core | .Net freamwork                         |
| UML 2.0<br>XP Extreme         | Java<br>Javascript            | Core.Net<br>Visiual Studio (2008-2019) |

|                               |                          |                                     |
|-------------------------------|--------------------------|-------------------------------------|
| Dynamic systems Development   | HTML5, CSS 3             | Version-control system (Azure, Git) |
| Joint Application Development | Python for security      | NetBeans IDE 6.0                    |
| FDD methodology               | Bash script              | Team Foundation Server              |
| RUP methodology               | Angular JS, VUE , Jquery |                                     |

### DB Beheersysteem

|               |            |            |
|---------------|------------|------------|
| MS SQL Server | Oracle 10G | PL/SQL     |
| MangoDB       | MS Access  | PostgreSQL |

### Werk Ervaring

#### Bee\_ieda stichting

|                               |   |
|-------------------------------|---|
| <b>Periode</b>                | Van feb 2019 tot 15 nov                 |
| <b>Functie</b>                | Full Stack developer                    |
| <b>Methode &amp; techniek</b> | SCRUM ,Azure , GIT                      |
| <b>Programmeertaal/tools</b>  | C#,Asp.net, javascript ,HTML5, Core.net |
| <b>DB/DC</b>                  | MS SQL Server 2017                      |

Bee-team and i are working in developing a many kind of software , one of them is KM , KM is automated system connect five clothes library . Km is a new idea and social experment that have many Features . to achive this features we use :

- Html5 ,css3 ,javascript, typescript
- C# & core
- Git and azure technology
- Code first
- MVC
- Cloud technlogy

## COM1 BV

|                 |   |
|-----------------|---|
| <b>Periode</b>  | Dec 2017 – Jun 2018                                       |
| <b>Functie</b>  | Networking Engineering                                    |
| <b>Techniek</b> | VSphere VMW – Network Virtualization, ESXI,-<br>VPN-hyper |

During my working in com 1 i was working with team in building infrastructure for some of com1 client , i was working in:

- System installation, defining, documenting and enforcing system standards.
- Configure Avay switches and routers v3.
- Configure firewall (Palo Alto - cyberoam).
- SDN protocol (Open Flow ) applied
- Configuration Ccna equipment
- Build networking

## Techno4all (Remotely)

|                                  |  |
|----------------------------------|--|
| <b>Periode</b>                   | Jan 2016 tot Jun 2017  |
| <b>Functie</b>                   | Software developer   |
| <b>Methoden &amp; technieken</b> | SCRUM, TDD   |
| <b>Programming /tools</b>        | C#, MVC4, T-SQL, HTML 5, CSS 3, Javascript,<br>jQuery, NUnit |

I was a sub contractor working remotly with (techno4all) insider team to developing a system for Retail sale centers . to achive this we used Scrum and agile . my roles in this project was

- Testing, debugging and maintaining programs
- Writing new class, methods, function
- Writing operational documentation
- Producing detailed specifications and writing the program codes
- deploying and Maintaining the system

## RCC (Rapid construction co)

|                          |   |
|--------------------------|---|
| <b>Periode</b>           | Sep 2012 Tot Jun 2014                           |
| <b>Functie</b>           | IT manager Assistant                            |
| <b>Methode</b>           | Agile   |
| <b>Technieken /tools</b> | Network Virtualization, ESXI, Remote app beheer |

As a IT manager Assistant i was responsible for planning, development, testing and ongoing technical support of the infrastructure and production services. Manages, coordinates and prioritizes activities for commercially available applications. I Participates in the development of specifications and continuous management of proposals and contracts for hardware, software and services. i was helping in manages, controls, coordinates and prioritizes the Rcc technology infrastructure, including data network, public safety network, system management and database management.

## SyrianTelecom

|                          |                       |
|--------------------------|-----------------------|
| <b>Periode</b>           | Jun 2010 Tot Sep 2012 |
| <b>Functie</b>           | Database developer    |
| <b>Methode</b>           | Agile /scrum          |
| <b>Technieken /tools</b> | Pl/sql                |

As Database developer my role was Analyzing and diagnosing problems and reported to responsible persons.  
researching and identifying third-party software that improve the development process and installing configuring database system software plus system tools. optimize Performance and monitoring, measurement and capacity planning of solutions for production software, recommending changes to all script products and "standardized" system configurations.  
Regularly implemented, test and evaluate appropriate data access and security measures, including access control, audit, backup / restore, and system rebuild and restore processes  
Stay informed with the DB technology and development methods.  
Support for high coding standards by participating in code assessments  
Ability to analyze and change C # code to address documented defects or new product features
